

### **James Dickinson – CEO, Capacitate Group**

With global CIO and CSO experience, James specialises in business, IT and cyber strategy.

After working in the capacity of CIO for many large organisations James chose to move his focus to supporting the New Zealand mid-market, as the engine room of our economy.

His collection of companies under the Capacitate Group banner include; **Unisphere** which delivers business and IT strategy advisory, **Cyber Tribe** for IT policy management and cyber awareness training, **TRAC** (The Robots Are Coming!) specialises in business process automation & robotics, and finally **MVP** (Minimum Viable Protection) which helps lift your cyber preparedness by scoring your organisations cyber risk appetite and posture.

Having also held senior marketing, product management, sales, strategy and CIO roles, James takes a 360-degree view to solving complex business problems, rather than adopting a technology centric view.

### **Desi Lorand – Chief Executive, Director, Founder and Lead Software Designer**

Desi is the founder and lead software designer for eCloud and its parent company Power Business Services (PBS).

She has a huge depth of knowledge and experience around the design of high-quality digitisation projects that deliver metadata with 99%+ accuracy.

Her background has been a career spent in IT services, that specialised in records processing and management.
